

ABSAUGWERK GmbH

Company Profile

REAL. BETTER.

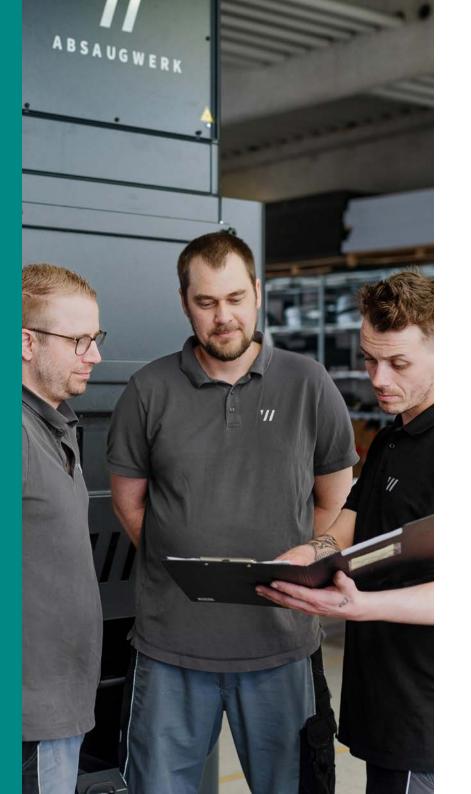

ABSAUGWERK stands for high-quality extraction solutions for the protection of people, machines and the environment in the manufacturing industries. We are proud that with our systems, we make workplaces safer and cleaner. Hence, we not only actively contribute to the protection of employees, but also increase the service lives of machine parks and significantly reduce environmental impacts.

SERVICE & DISTRIBUTION

In order to guarantee the quality of our high-end systems, we manufacture our units in our own factory and manage the entire service chain from the first consultation and planning right up the installation of pipe systems and after-sales services such as maintenance or filter replacement.

Smoothly. Reliable. Safe.

EXTRACTION SOLUTIONS

We manufacture extraction systems for a wide variety of industries, processes and materials. With our individual system components, we find the optimal solution for nearly every application.

Specifically for your process!

- Mechanical engineering
- Automotive
- · Metal & iron
- · Stone & earth
- Food
- Environment & recycling
- Powder & pharmacy

- Welding
- Grinding & polishing
- Sawing, cutting, separating
- Turning & milling
- Lasering

- Smoke
- Dust
- Chips
- Granules
- Gas & mist
- Oil & emulsion

PRODUCT PORTFOLIO

Our product portfolio ranges from industrial deduster, fume filter, oil mist separator and wet separator right up to complete production hall ventilation systems. Our many years of experience in extraction technology is the foundation of our know-how and of our process and application knowledge.

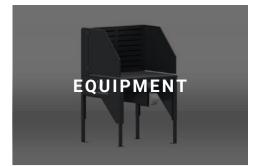

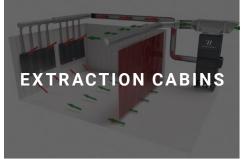

WORLD WIDE WERK

Production processes must run smoothly and efficiently for maximum profitability.

Remote maintenance systems monitor relevant parameters such as machine condition, filter saturation, maintenance intervals, operating hours, sensor technology and many other indicators in real time and send automatic alarm messages if necessary. Thus, malfunctions can be remedied at an early stage and consequential damage and machine downtimes can be avoided.

Worldwide available.

POWERFUL & SUSTAINABLE

As a manufacturing company for the most varied industrial sectors, we bear a special responsibility for the quality of our products and processes as well as for the preservation of our environment and resources.

The flexible components of our systems enable us to configure custom-made extraction systems and so ensure a positive energy balance. As opposed to standard systems, our extraction systems consume only the amounts of energy, air and water that are actually required.

Durable. Flexible. Efficient.

REAL. BETTER.

- Tailor-made extraction solutions
- For every industry & every application
- Numerous variants & options
- 360° service: from consulting to after-sales service!
- Quality made in Germany
